

Letter to parents

Dear Parents,

The management, teachers, and staff of the Secondary School in Mana are here to guide and help your children so that in time they obtain a diploma, find a job, and behave properly in society.

We cannot accomplish our mission of teaching and educating **properly without** your help and engagement.

For some time now, students have been fighting daily.

And recently, a student has even taken out and used a hammer. Violence is spreading, our school, a place of study and learning, had to close for four days **because** of this problem of insecurity.

It is reported that several students come to school with weapons such as knives, hammers, scissors, screwdrivers, tampered combs, broken glass, and there is also trafficking of illicit substances.

This behaviour is **unbearable, unacceptable, and strictly forbidden**. Students caught with such substances will be excluded from the school. **We do not want this to happen again.**

Parents, **you** are actors of the educational community, **without you**, it will be difficult to achieve the goal which is the:

Success of the Leopold Elfort secondary School of Mana.

Let's get back on track for the success of our children, for the success of French Guiana.

The management and the staff
of the Leopold Elfort secondary school of Mana
